Build an Agentic AI Application in One Day

Learn how to build, govern, and deploy agentic AI applications through a full day of hands-on work. Using C3 Code, your own data, and a high-value use case, your team will build a working application and gain the skills to continue building after the event.

8:30–9:00 AM	Arrival & Coffee	Meet the team, enjoy coffee, and connect to your workspace and data.
9:00–9:45 AM	Building Agentic AI Apps for the Enterprise with C3 Code	Nikhil Krishnan, CTO and Chief AI Officer, C3 AI Stephen Ehikian, President, C3 AI Learn how to identify agentic AI opportunities with meaningful business value and develop them into secure, scalable applications. Nikhil and Stephen will share real-world customer success stories, including what teams built, how they deployed it, and the results they achieved. They will then walk through the complete build process, from grounding agents in enterprise data and orchestrating models, tools, and workflows to applying security and governance. A live demonstration of C3 Code will bring it all together before participants begin building their own applications.
9:45–10:30 AM	Get Hands-On With C3 Code	Explore example prompts, build your first applications, and experience how C3 Code works firsthand. Learn the fundamentals before applying them to your own use case and data.
10:30–10:45 AM	Break	
10:45 AM–12:30 PM	Build Your AI Application	Work with enterprise AI experts to build on your own data. Create the data model and application logic, then add agents, grounded retrieval, workflows, analytics, dashboards, forms, and machine learning capabilities relevant to your use case.
12:30–1:30 PM	Lunch	
1:30–3:00 PM	Make Your Application Enterprise-Ready	Get practical advice from enterprise AI experts who have built and deployed applications in production. Explore ways to improve your application, add features, connect tools and data sources, refine the user experience, test agents and workflows, and prepare for deployment in a governed environment.
3:00–4:00 PM	AI Application Showcase	Present the application you built and share what you learned along the way. See what other teams created, learn from their approaches, and exchange ideas for improving and extending each application.
4:00–4:30 PM	Accelerate Your AI Roadmap	Get an expert assessment of your AI priorities and roadmap. Apply the day's insights to strengthen current initiatives, sharpen the business case, identify what is required for production, and uncover additional use cases across your organization. Leave with a focused AI roadmap grounded in business value, feasibility, and clear next steps.
4:30–5:30 PM	Happy Hour	Continue the conversation with fellow participants and the C3 AI product & engineering leadership over drinks and light refreshments.
