

C3 Generative AI for Workday

Supercharge Workday Investments

C3 Generative AI for Workday is a unified knowledge source that empowers enterprise users to quickly access and act upon data and insights stored across Workday investments.

Rapid Access

to relevant, critical, and high-value insights across disparate datastores, applications, and information systems

Domain Specific

models combining industry and functional expertise to help enterprises achieve critical business outcomes

Enterprise Grade

data security, access controls and flexible deployment allow enterprises to meet strict security and privacy requirements

Future Proof

investments with a LLM-agnostic architecture and ability to integrate and leverage existing data and software investments

Organizations with existing Workday investments need deep subject matter expertise to find the data and analytics stored across Workday systems. Human resources, talent acquisition, and finance teams find it increasingly complex and time-consuming to navigate large volumes of data across internal and external information systems and locate relevant insights.

C3 Generative AI for Workday enhances productivity and improves employee satisfaction with accelerated time to insight. Users can ask questions in natural language and receive accurate answers ranging across employee records, candidate resumes, internal investigations, benefit elections, performance ratings, and payroll.

C3 Generative AI for Workday is an enterprise-ready solution with support for structured and unstructured data, a LLM-agnostic architecture, deterministic responses with source references, and granular enterprise access controls. C3 Generative AI for Workday offers rapid configurability with a prebuilt Workday connector and supply chain, human resources, and finance domain object models.

Use Cases

- **Quickly access insights** from anywhere in your Workday instance, including employee surveys, performance data, candidate insights, and retention metrics
- **View employee specific information in one place** related to start date, role, compensation details, reviews and ratings, communication logs, and HR tickets
- **Streamline workforce analytics** through complete visibility to benchmarking data, KPIs, employee sentiment, and ratings
- **Minimize payroll delays and errors** with visibility to payroll processing, HR transactions, employee payroll tickets, and compensation plans
- **Enhance human resource management** by empowering human resource teams to rapidly query information on benefit administration, global talent profiles, and re-organization changes
- **Optimize talent management** through improvements in talent retention and acquisition with visibility to open requisitions, fill rates, hiring gaps, and job descriptions
