

C3 AI Strategic Integrator Program

Develop High-Value Enterprise and Operational AI Applications Using the C3 Agentic AI Platform

Rapid Development

of relevant, critical, and high-value solutions using the C3 Agentic AI Platform and pre-built applications.

Enterprise-Ready

software, developer resources, and training to enable you to meet and exceed customer requirements in any security compliance regime.

Pre-Built Applications

available to extend and modify as necessary, tailoring AI solutions for your customer needs.

Future-Proof

your AI investments with a modern, open systems architecture that allows for easy, continuous updates, including 3rd-party offerings.

The C3 AI Strategic Integrator Program (SIP) provides the license rights, sublicense rights, technical support, and training platform to enable C3 AI SIP partners to rapidly design, develop, provision, and operate highly customized enterprise AI applications (as derivative works of the commercially available C3 Agentic AI Platform and C3 AI enterprise applications) to meet the needs of U.S. federal, defense, and civilian agencies.

The C3 AI SIP is designed for system integrators, consulting firms, defense technology companies, original equipment manufacturers, and enterprises seeking to provide their customers with advanced AI software applications or for internal use. Derivative works independently developed by a SIP partner on the C3 Agentic AI Platform remain the partner's intellectual property.

This program provides a comprehensive enterprise AI application development platform powered by the C3 Agentic AI Platform. The C3 Agentic AI Platform offers enterprise-class capabilities for omni-model data integration, multi-database persistence, data virtualization, object modeling, AI/ML pipeline development, complex AI agentic orchestration, and deployment across cloud, on-premise, and hybrid environments. C3 AI offers a suite of pre-built enterprise and operational applications that further accelerate time-to-value.

The C3 AI SIP is a unique offering accessible to select partners. Partners have the opportunity to leverage C3 AI's significant investments in the C3 Agentic AI Platform, as well as the advanced capabilities of 130+ pre-built C3 AI applications to accelerate AI transformation for their customers.

Key Benefits

- **A developer(s) license to the C3 Agentic AI Platform** including ongoing platform upgrades.
- **Optional licenses to one or more pre-built C3 AI applications.**
- **Training for developers and data scientists** to enable self-sufficiency in design, development, provisioning, and deployment of C3 AI applications.
- **Optional C3 AI CoE experts** to join and support your team.
- **Installation guides** to deploy applications with confidence across multiple clouds or on-premise.
- **Early access to marketing and promotional opportunities at various C3 AI events** to accelerate your go-to-market initiatives.
- **Quarterly review of C3 AI product roadmaps and customer deployments** to ensure you are well-positioned to leverage the latest updates to the C3 Agentic AI Platform and C3 AI applications.

The Program includes:

- Developer access to the C3 Agentic AI Platform: Utilize the C3 Agentic AI Platform to build powerful, custom applications. This includes sublicense rights to provide resultant applications to your customers with a “powered by C3 AI” label.
- License to extend pre-built C3 AI applications: Upon purchase of C3 AI’s pre-built applications, the C3 AI SIP provides the right to modify or build extensions to those applications. You are also provided a license to sublicense those modifications to your customers with a “Powered by C3 AI” label. Any extensions or modifications to C3 AI applications developed independently by a SIP partner remain the partner’s intellectual property.
- AI Center of Excellence (CoE): C3 AI SIP partners will receive premium support services by C3 AI through a joint AI CoE comprising your team and C3 AI full-time equivalent personnel (“FTEs”) with solution architecture, data integration, data science, and application development expertise. Leveraging C3 AI CoE FTEs accelerates the design, development, provisioning, and deployment of C3 AI applications.
- Training: C3 AI SIP partners can access comprehensive developer and data science workshops intended to provide advanced training in skills related to the C3 Agentic AI Platform and C3 AI applications. Workshops include hands-on labs, certification paths, and ongoing support to ensure self-sufficiency.
- Unlimited C3 AI runtime subscription fees during development: SIP partners incur no C3 AI runtime subscription fees while developing their applications — enabling agile, cost-effective innovation and testing.
