# Our Products

## C3 Generative AI

C3 Generative AI helps users easily retrieve data, analyze information, surface insights, and initiate workflows for demanding, high-value use cases that require accurate and reliable performance, including for intelligence agencies and constituent services. These applications have an easy-to-use chat interface, where natural language commands can orchestrate multiple AI agents — performing complex tasks and improving efficiency.

## C3 AI Applications

An expanding portfolio of turnkey and ready-to-use Enterprise AI applications that address a range of high-value use cases. With C3 AI applications, organizations can deploy enterprise-scale production AI applications in weeks. Each of these applications is extensible and customizable to meet customer requirements.

## C3 Agentic AI Platform

The C3 Agentic AI Platform is software that uses a model-driven architecture to accelerate delivery and reduce the complexities of developing enterprise-scale AI applications. The C3 Agentic AI Platform enables organizations to deliver AI-enabled applications faster than alternative methods.

## Our Customers

C3 AI software is used by some of the world's largest organizations — including Shell, Bank of America, Holcim, the U.S. Air Force, the U.S. Army Georgia-Pacific, Koch Industries, Cargill, Nucor, Baker Hughes, the U.S. Chief Digital and AI Office, SWIFT, and AMD — to improve operational efficiencies, enhance employee experience, and drive scalable digital transformation across the enterprise. We serve customers in manufacturing, energy, financial services, defense and intelligence, healthcare, the public sector, and more.

## Our Partners

To ensure our customers' success, C3 AI has developed a rich partner ecosystem with leading technology and services providers globally, including Microsoft, AWS, Google Cloud, Baker Hughes, Booz Allen, McKinsey & Company, Paradyne, and others.
